

## July 2017 Grounds Board Report. 34 hours for July

Tuesday July 11 2017 10 hours

Everyone who is returning in July are here. So as Mark says (we are back in the saddle.) Bob and Mark fixed a reader board and picked up around the Nature Park. The monsoons will help the plants, but some of them look pretty weak. Mark and Bob will assess the plant situation and probably have Hot Desert remove the ones that didn't make it. Bob and Mark are waiting for the weeds and buffle grass to spring up and keep them busy for awhile. For you northerners who have been wondering about the weather, Mark says there have been a few days over 110. Ron did his last mow before his surgery, Bob M. has the Nature Park in great shape and Sharon has the fountain running clean. A big thanks to our summer crew.

Tuesday 18 & Friday 21 around 10 hours.

Bob and Mark spent the morning spraying weeds and cleaning up debris on the Nature Trail from the recent monsoons. They spent the whole week in the Nature Park. Mark says Hot Desert is working the heat as they continue to clean up and maintain our Parks and common areas. Hot Desert says they owe us a few hours so we will use those hours later in the fall. Lee Blahnik has returned and is now available to help Bob and Mark.

Tuesday 25 8 hours.

Lee is back helping Bob and Mark. They cleaned up a bunch of debris around the Nature Park, weed whipped a bunch of weeds and cleaned up the fountain. It's hot also. Friday they are going to break out the new mower and take care of the grass. The rains bring out the weeds and grass. Lots to do in the summer. Missing you all.

Friday 28 6 hours

Bob, Lee and Mark cut grass, trimmed weeds and cleaned up the Nature Path. Tuesday Aug 1 Mark will continue to maintain weeds (that is pig weed) in the Nature Park. Bob and Lee will clean up the fountain and fix a sign on Comica.
