Grounds Report to the Board, October 2026

Volunteer Hours	58
Debris Removed	12

Tucson Urban Forestry completed the tree-trimming work behind Nardos and on two other mesquite trees.

Our landscaping company and the grounds crew have been working in Perry Park to repair the irrigation system to hopefully get it ready for planting this month.

Special thanks to the Perry Park committee for all their hard work on this project.

Thank you, George Anderson, for leading the Grounds Crew over the last few weeks.

Thank you, Cynthia Drake, for buying and storing the plants that will be planted in Perry Park this fall and winter.
