President's report – October, 2026

We had a bit of a slow September from a meeting perspective but transacted normal business and activities. That includes working with the treasurer on finalizing the budget and signing checks, working on The Crew, and working on Master Association matters regarding the Springs to Greens cart path.

Jim Clausen and I attended a full day classroom and field study on home and community fire safety. It was sponsored by the Arizona Dept. of Forestry and Fire Prevention leaders for the southern zone, Captain Deleskiewicz and Firefighter Scott McQuarter. Jim and I received approval for Resident Firewise Assessment.

The Firewise Committee (George Anderson, Jim Clausen, and Bruce Grieshaber) will be presenting a schedule of events for the late fall and winter to further educate our residents on what, why, and how we can use the Firewise Recognition resources to make our already fire safe community even better. We're excited to share our total community Firewise plan over the next few months and how each homeowner can look at their home and yard and make it almost fire proof.

Victor and I attended a class put on by the Pima County Geographic Information System mapping professionals. We learned how to use the Pima County Maps website and apply various filters on searches for boundary lines for arroyos and washes, open areas, property rights, subdivisions, etc. It will help us with resident property line questions and for mapping out our Grounds Crew work.

As always, I'm deeply appreciative of all the work the Board members do on a regular basis and for all our wonderful volunteers who accomplish so much every day.

Respectfully submitted,

Bruce Grieshaber, President
